CONTROL STICK FUNCTION

The Nintendo® 64 Controller contains a Control Stick which uses an analog system to read the angles and direction of its movement. This allows subtle control that is not possible using the conventional + Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press **START** while holding the **L** and **R** buttons.

The Control Stick is a precision instrument, make sure not to spill liquids or place any foreign objects into it.

NOTE
The Control Stick functions identically to the Control Pad throughout all menus.

NOTE

The **Z** and **L** buttons activate the same actions during gameplay.

STARTING THE GAME

1. Turn OFF the POWER switch on your Nintendo 64 Control Deck.
WARNING: Never try to insert or remove a Game Pak when the power is ON.
2. Make sure a Controller is plugged into Controller Socket 1 on the Control Deck.
3. If you're playing against a friend, plug the other Controller into Controller Socket 2.
4. Insert the Game Pak into the slot on the Control Deck. Press firmly to lock the Game Pak in place.
5. Turn ON the POWER switch. The *Knockout Kings™ 2000* logos appear, followed by the Title screen. If you don't see them, begin again at step 1.
6. At the *Knockout Kings 2000* Title screen, press **START** to advance to the Main menu.

SIGNATURE PUNCHES AND COMBOS

Signature punches are “trademark” punches and/or combinations that distinguish one fighter from the others.

- ➔ Press **C▲, ▼, ◀, or ▶** to initiate one of your fighter’s signature moves.
- ◆ At any time during a signature move you can cancel that series of punches by tapping the Control Stick backwards.
- ◆ A small amount of health is deducted each time your fighter throws a signature punch combo. Be sure to use them wisely.

SUPER-CHARGED PUNCH

Each time you connect with a punch your Punch Meter begins to fill. Fill your Punch Meter completely and you are awarded one Super-Charged Punch: a single shot that packs enough force to drop a Clydesdale. Once it is thrown (hit or miss), your punch power returns to normal.

- ➔ Once your Punch Meter is full, press **R + A + B** to activate.

GETTING OFF THE MAT

blue Energy Bar

Whenever you find yourself kissing the canvas, you can attempt to pull yourself up and continue boxing.

- ➔ Toggle the Control Stick ↔ in a rapid manner to refill the blue Energy Bar and get back on your feet.

The faster the toggle, the faster your fighter regains health and rises to his feet. As the energy line replenishes with each toggle, so does your Health Meter. Fill up before the 10 count and you've survived a KO, at least for the moment. The more times you get knocked down, the harder it is for you to refill your Energy Bar and Health Meter.

➔ Press **A** to access the available sub-menus or selections under that option.

➔ To load a created boxer into Slugfest or Career mode, select him on the boxer grid and choose "load" when the prompt appears.

◆ The Slugfest skills you assign your fighter in Create Boxer mode apply only when fighting in Slugfest mode. When launching a career using a created boxer, your skill level is measured by how many points you earn in training - not by how many skill points assigned to him in Create Boxer mode.

TIP Remember to Save your boxer before turning off the game system. (> Saving and Loading on p. 18.)

TO NAME YOUR FIGHTER:

1. Control Stick to highlight a letter.

2. Press **A** to enter that letter choice in the name space.

3. Select **END** to enter your name and go back to the Attributes screen.

➔ Press **START** to default to the **END**.

CAREER MODE

Select your boxer from a variety of top ranked pros and lead him up through his weight class and on to a shot at the title. (Follow the game setup guidelines as indicated in *Starting A Slugfest* on ➤ p. 7.)

➔ You begin your career in the cellar, ranked 20th. It's your job to work your way from those smoky, Tuesday-night brawls to those 12-round, pay-per-view spectacles.

◆ When launching a career using a boxer you created, your skill level is measured by how many points you earn in Training mode - not by how many skill points assigned to him in Create Boxer mode.

TIP

Remember to Save your boxer before turning off the game system. (➤ *Saving and Loading* on p. 18.) You will be able to save your boxer (along with his current standing) after every fight.

Following the announcement of the winner, you are treated to a punch-by-punch tally of your fighter's point totals for the fight, as well as his cumulative total for his entire career. Earning points makes it easier to climb the ranks.

◆ In Career Mode, if you lose a match, you may choose to fight that same boxer again or select another one from the leader board.

NOTE

Boxers who are grayed-out cannot be selected.

SCORING

The winner of the round is the boxer who best displays clean punching, solid aggressiveness, ring domination, defense, and lands the most — and most effective — blows during the bout. Knocking your opponent down will almost secure a round in your favor.

TRAINING

Before each fight you can visit the gym and work out those blistering combinations and lethal jabs. Spar on offense, defense, or let the computer train for you. After training, you are awarded points, which you can use to boost your boxer's overall prowess.

EA SPORTS' EXCLUSIVE BOXERS

MUHAMMAD ALI: RECORD: 56-5 (37)

Career Capsule: Ali won the gold medal at the 1960 Rome Olympics as a light heavyweight. He is considered by many experts to be the greatest heavyweight who ever lived. He shocked the world with his stunning upset over Sonny Liston (KO 7) in 1964 and made nine successful title defenses. He regained the title in 1974 and became the first man to win the heavyweight crown three times by beating Leon Spinks in the rematch (W 15) in 1978. He had three classic wars with Joe Frazier, ending the best trilogy in boxing with the "Thrilla in Manila" in 1975.

Fighting style: "The Greatest" possesses the fastest hands and feet in heavyweight history. Besides his lightning quick jabs that sting like a bee, Ali also has probably one of the hardest chins in the business. He is almost impossible to knock down with just one punch and is an amazing tactician. Plan on using combinations if you want to be effective against "The Greatest of all time".

JOE FRAZIER: RECORD: 32-4-1 (27)

Career Capsule: Joe Frazier began boxing to lose weight, and eventually became a fine amateur, winning the gold medal at the 1964 Olympics. Frazier later became heavyweight champion and held the title from 1970 to 1973, but he is most noted for being probably the toughest opponent Muhammad Ali ever faced. Frazier handed Ali his first pro defeat in "The Fight of the Century" in 1971, taking a 15-round decision. Frazier floored Ali for only the third time in Ali's career in the final round of that bout. Their series carried on into 1975, concluding with "The Thrilla in Manila," when Frazier was unable to answer the bell for the 15th round.

Fighting style: "Smokin" Joe has the most fearsome left hook in heavyweight history. Because of his short stature, the 5-foot-11 Frazier will bob and weave his way inside then hammer away with his devastating hook. He is not noted for his defense, so take advantage of this whenever you can by working the jab and throwing combinations.

EVANDER HOLYFIELD: RECORD: 35-3-1 (25)

Career Capsule: Holyfield will go down in boxing history as only the second man besides Muhammad Ali to win the heavyweight title three times. A former cruiserweight champion, Holyfield won his first title in 1988, lost it in his fourth title defense in 1992, regained it in 1993, and when it was believed he was past his prime, won a portion of the heavyweight crown a third time in 1996.

Fighting style: "The Real Deal" has a tremendous heart, granite chin, and the ability to absorb great amounts of punishment. Holyfield's right hand packs a lot of heat so be patient and try and catch him late in the fight.

LENNOX LEWIS: RECORD: 33-1-1 (27)

Career Capsule: Lewis won the heavyweight gold medal at the 1988 Olympics for Canada. He is a two-time heavyweight champion. He won a portion of the heavyweight crown in 1992, and lost it in his third title defense in a surprising upset, but regained it again in 1997.

Fighting style: Lewis possesses one of the most powerful right hands in boxing. For a big man of 6-foot-5, 245-pounds, he moves extremely well. Watch out for his awesome right cross and uppercut.

OSCAR DE LA HOYA: RECORD 31-0 (25)

Career Capsule: De La Hoya won gold at the 1992 Olympics in Barcelona and is considered by boxing experts to be pound-for-pound one of the best fighters of the 1990s. He has already claimed titles in four weight divisions: junior lightweight, lightweight, junior welterweight and welterweight. He scored his biggest victory to date with a 12-round, split decision against Ike Quartey in 1999. He also owns a pair of victories over the great Julio Cesar Chavez.

Fighting style: "The Golden Boy" may exhibit a brawling, in-your-face style. Watch out for his left hook, the most dangerous weapon in his vast arsenal. Oscar also has great defensive skill while using his quick reflexes. One strategy is to work De La Hoya to the body early in the fight to try and slow him down.

RAY LEONARD: RECORD: 36-3-1 (25)

Career Capsule: Leonard captured Olympic gold and the hearts of America in 1976. He is the only man to win titles in five different weight divisions: welterweight, junior middleweight, middleweight, super middleweight and light heavyweight. He is most noted for his rematch with Roberto Duran in 1980, a fight that avenged his first career loss. Then he came out of semi-retirement to upset Marvin Hagler in 1987 to win a portion of the middleweight belt.

Fighting style: "Sugar" Ray Leonard is fast, powerful and stylish. His many skills blend together to make Leonard a very dangerous fighter. He is most effective as a boxer but can slug it out when needed. Time your punches and you may catch Ray off guard.

SHANE MOSLEY: RECORD: 33-0 (31)

Career Capsule: Mosley could emerge as the new pound-for-pound king as the new millennium emerges. He has soundly beaten all comers. He won a portion of the lightweight title in 1997 and scored five knockout victories in his first five title defenses.

Fighting style: "Sugar Shane" has great boxing ability, superior hand speed and footwork. He can throw a variety of punches from different angles, and also has one-punch power that can land with remarkable accuracy. Don't waste your energy and pick your shots carefully.
